

CASKET LID AND METHOD OF MAKING SAME

Abstract of the Disclosure

A method of making a lid for a casket comprises providing
tooling configured to produce a one-piece, unitary casket lid having a crown,
5 a pie, a rim and a header, providing settable material from which to mold the
lid, molding the settable material with the tooling, permitting the settable
material to set thereby producing a one-piece, unitary casket lid having a
crown, a pie, a rim and a header, and adhesively applying a wood veneer
sheet to at least a portion of the lid. The veneer sheet can be applied with
10 either a membrane press or a profile wrapping machine.
